“ With the impact of Climate Change **Client Name goes here** has made a commitment to the future with our Environmental and Recycling Policies. We understand that as a community we all have a role to play in facing the challenges of Climate Change.

We are addressing our present procedures and introducing new environmental and recycling initiatives. One of these initiatives is to provide our visitors with new recycling services within all public areas. By providing you with these new recycling services we will assist the local community to divert recyclable material away from a landfill into a resource recovery facility. By diverting these recyclables you will help reduce our dependency on valuable raw materials used in the production of new products, reduce the volume of waste to landfill and reduce our impact on the environment.

To find out more please contact **Client Contact details go here.**”
